Week 10

Check your fistula every day.

If you do not know how, ask your Dialysis Care Team to teach you how to monitor your fistula.

Look

Listen

Feel

Did you notice anything different when you checked your fistula today?

No change.

Yes, a change.

Great! Keep checking each day. At your next treatment, tell your Dialysis Care Team that there was no change.

Call the contact given to you by your Dialysis Care Team. Share what you found. They will tell you what to do next.

“Ready, Set, Go” The Steps to Catheter Freedom Week 3: New Fistula Daily Check

Look

The surgery site is **clean and dry**.
The skin over the fistula is **all one color** and
looks like the skin around it.

The hand **looks the same** as it did before
surgery.

There is **redness, swelling** or **drainage**.

The arm is **bruised** and/or the hand is **not the
normal color**.

Listen

When you place your fistula next to your
ear, **you hear the sound of the blood going
through it**.

As the fistula grows larger, the sound
becomes louder.

You hear no sound or decreased sound.

Feel

You **feel the fistula** under the skin. At first,
the fistula seems small, but it should grow
over time.

You cannot feel the fistula. The hand of the
affected arm feels **numb** or **cold to the touch**.

"Ready, Set, Go" The Steps to Catheter Freedom Week 3: New Fistula Daily Check

Feel

Thrill: A vibration or buzz that can be felt best over the scar. This is where the artery and vein are joined together. The thrill becomes stronger over time as the fistula grows.

You feel the thrill along the rest of the fistula, but it doesn't feel as strong as it does over the scar.

You cannot feel the thrill or it is weaker over the scar than it was the last time you checked it.

Pulse is a slight beating that feels like a heartbeat. When you place your fingers lightly on the fistula, they move slightly.

The beat is stronger than a normal pulse. Fingers placed lightly on the fistula rise and fall with each beat.

**Ask a member of your Dialysis Care Team to complete the form below.
Did any of the results of your daily fistula check fall under the "STOP" column?
If so, call the contact listed below and share your results to find out what to do next.**
