You're Not Alone

Rhonda: “I had a number of medical obstacles to overcome but you will find people willing to help. Follow their guidance and have patience even when you cannot see the light at the end of the tunnel.”

Candee: “Weight was a barrier for me and I had gastric bypass surgery. It has been a journey but worth it.”

Jorge: “The distance I had to travel to the transplant center was an important factor, as it was three hours away, but I received a lot of care and orientation from doctors and staff.”

Chris: “My transplant journey totally changed my whole being. I was given a second chance at life. It is now my mission in life to help educate others.”
